

Dear Student,

You are receiving this notice because you have expressed interest in the Athletic Training Program (BSAT; MSAT) or have enrolled in a course that is a required course for the program, and the program is one which prepares one to practice a field or trade that may be considered professional practice in certain states, and therefore, may require licensure or certification to practice in that field or trade. However, educational requirements for licensure or certification vary by state. The Athletic Training Program (BSAT; MSAT) has published more information on their website (<https://harriscollege.tcu.edu/athletic-training/academics/>). The following chart identifies the U.S. states and territories in which the Athletic Training Program meets the requirements, does not meet the requirements or we have not made a determination if the curriculum meets the requirements.

Although TCU works to determine and disclose whether the program satisfies the educational requirements for licensure in each state, licensure or certification often requires more than finishing the program. Students should inquire with the state licensing authority in the state in which the student wishes to practice to learn about all licensure requirements in their field. Additional licensure requirements for individuals may include professional examinations, background checks, years of work experience, fingerprinting requirements, etc. Students who plan to pursue licensure or certification should also be aware that state requirements are subject to change.

Prospective and current students should keep in mind that licensing requirements vary by state. If you are considering relocation, please contact your program to check whether the program meets your new state's educational requirements for licensure.

If you need further assistance please contact Stephanie Jervas at s.jervas@tcu.edu or 817-257-5733 in the Athletic Training Program.

Thank you,

Note: Currently, 49 states and the District of Columbia regulate the practice of athletic training. Individuals must be legally recognized by the appropriate state regulatory agency prior to practicing athletic training. The BOC exam is recognized by all Athletic Trainer state regulatory agencies to meet their exam requirement. Compliance with state regulatory requirements is mandatory and the only avenue to legal athletic training practice.
